LinkedIn: [linkedin.com/in/hojinjosephmok](https://linkedin.com/in/hojinjosephmok)

---

## Skills

**Languages:** Python, JavaScript, MATLAB, C++

**ML Libraries:** TensorFlow/Keras, PyTorch, Scikit-Learn, NumPy, Pandas, spaCy, NLTK, OpenCV, PySpark

**Databases:** MySQL, SQL, HBase

**Big Data:** Hadoop, Pig, Hive, PySpark

---

## Professional Experience

Yaya Foods Corp.

Toronto, ON

**Automation Engineer**, July 2019 – Present

- Developed data mining process that extracts PLC transmitter data, stores in MySQL database, and presents it to Client application designed in Python and Ignition Automation software
- Lead the automation design for several SCADA systems for beverage manufacturing clients by integrating Rockwell Automation PLCs/HMIs, Ignition, MySQL, and ethernet IP networks
- Determined root cause of production halts through strong troubleshooting skills for hardware and software

Apple Inc.

Cupertino, CA

**Recycling R&D Engineer Intern**, September 2018 – April 2019

- Designed semi-autonomous prototypes for optimal disassembly and recycling of Apple products. Designs continuously integrated feedback to improve operator ergonomics and meet California waste regulations
  - Prototype resulted in a 90% increase in the Unit-per-Hour output compared to the current manual methods
- 

## Projects

**Topic Modeling for Question and Article Categories**

[hjmok.github.io/josephmok\\_portfolio/#/TM](https://hjmok.github.io/josephmok_portfolio/#/TM)

- Used Scikit-Learn to implement Latent Dirichlet Allocation and Non-Negative Matrix Factorization methods to form clusters that acted as assigned topics to a Quora questions and NPR articles dataset
- Resulting model was able to assign each article/question to one of 12 topics, which the end user interprets

**TFIDF Text Classification**

[hjmok.github.io/josephmok\\_portfolio/#/TFE](https://hjmok.github.io/josephmok_portfolio/#/TFE)

- Created a supervised learning model using Scikit-Learn to classify Positive/Negative reviews in an Amazon Reviews dataset and Ham/Spam text messages in an SMS dataset.
- Applied Term Frequency-Inverse Document Frequency feature extraction to analyze the vocabulary
- Achieved a 98% accuracy on the SMS dataset and 86% accuracy on the Amazon Reviews Dataset

**Facebook Babi Dataset Chatbot**

[hjmok.github.io/josephmok\\_portfolio/#/CB](https://hjmok.github.io/josephmok_portfolio/#/CB)

- Created a chatbot by implementing End-to-End Memory Networks and LSTM layers with Keras
- Trained on the Facebook Babi Dataset, which consists of a Story, Question about the story, and Answer
- Resulting model achieved close to 95% accuracy on the training data and up to 90% on the test data

**Novel Text Generation Model**

[hjmok.github.io/josephmok\\_portfolio/#/TG](https://hjmok.github.io/josephmok_portfolio/#/TG)

- Used PyTorch to create a deep learning model that uses novels such as Shakespeare and Tom Sawyer as inputs, then outputs texts that match the tone/vocabulary similar to the input novel.
  - Model utilized LSTM layers and dropout layers, which fed texts in batches to help the model understand the grammatical structure of the novels
- 

## Education

University of Waterloo,  
**Bachelor of Applied Science, Honours Mechanical Engineering**, Graduated June 2019
